## BLACKLIGHTS® BLACKLIGHT AND BLACKLIGHT BLUE LAMPS

GSS has developed new technology for the safety coating of BL & BLB lamps. The coating incorporates the use of UV stabilizing resins that permits the passage of UV while still protecting the shatterproof properties of the coating. The answer for safe shatterproof lighting in Bug Zappers, Fly-Traps and Pest Control. Safety coated blacklights are safe for use in food processing and food service areas. Non-Yellowing.

### TOTAL COMPLIANCE

### ALL MAKES AND BRANDS

### SUPERIOR COATINGS SHATTERPROOF PROTECTION

- Lamps available for all makes and models of Pest Control devices
- All shapes, sizes and wattages including HID blacklights
- Teflon, Diamondcoat, A-Ion, and Mylon coatings allow for protection of any lamp without compromising UV output
- COATING ONLY available on customer's lamps
