SHATTERPROOF MARKET LITE® SHATTERPROOF MARKET LITE ULTRA AND PLUS

Market Lite® comes in three great colors to enhance the appearance of your products in the display case. Market Lite® Ultra is a broad spectrum lamp that peaks (produces the maximum relative energy output) well into the RED range of the spectrum. These full spectrum-like qualities provide excellent light output for your displays. It will make red meats look redder and fresher, improve the appearance of chicken, pork, and fish, while making vegetables appear richer in color.

MARKET LITE PLUS®

As highlighted in these spectral distribution graphs, the MARKET LITE PLUS® "peaks" (produces maximum relative energy output) well into the RED range of the spectrum. Meats look redder and fresher, vegetables appear richer in color, and the greens take on a deep, lush tone. At the same time, whites appear whiter and brighter, helping to enhance the other colors of the spectrum. The consumer will be impressed by your fresh, clean display. In turn, you will be impressed with the increase in sales due to the appearance of your products under the MARKET LITE PLUS®.

MARKET LITE PLUS®

Lamp	Watts	Base	Nominal Length	Bulb	Packed*	Average Rated Life Hours	Tube Diameter
