Freezer Cold Climate Lamps

## SUREGUARD®

### SHATTERPROOF INCANDESCENT LAMPS AND FLOODLIGHTS

Glass Surface Systems offers tough, durable protective coatings for a wide variety of Incandescent lamps. These lamp types often produce high bulb surface temperatures that reach around 300°F and higher. Sureguard with Mylon formulation maintains protection while withstanding temperatures of up to 480°F constant.

It is the only crystal clear coating on the market that guarantees containment of glass while giving you over 99% of its original light output. Mylon handles constant heat up to 480° F without discoloration.

#### TOTAL COMPLIANCE

#### ALL MAKES AND BRANDS

#### SUPERIOR COATINGS LONG LASTING PROTECTION

- Mylon provides superior, non-yellowing shatterproof protection
- Crystal clear, doesn't affect CRI
- Any size and shape lamp shatterproofed A,PS,PAR, BR, MR, Globes, Flame
- Coating Only orders on your lamps
